

Orhan Özkerçin

SENIOR FRONTEND DEVELOPER

İzmir, Turkey orhan@ozkercin.dev [LinkedIn](#) [GitHub](#) [avenga.hire-me.today](#)

APPLICATION · SENIOR FRONTEND ENGINEER - REACT + NEXT.JS

FRONTEND OWNERSHIP AT SCALE

Customer-facing products that cannot afford to feel slow.

Frontend developer with six years of commercial experience across React, Next.js, Vue, and Angular products. Recent work combines transaction-heavy B2C journeys, high-traffic React delivery, performance, frontend architecture, API contributions, CI-backed automated testing, and cross-functional product work.

WORKING PRINCIPLE

Shipping is part of ownership - not the finish line.

I connect implementation decisions with user experience, maintainability, production behavior, and the feedback that follows a release.

Role-aligned strengths

RECENT, COMMERCIAL EVIDENCE

01 React + Next.js Recent production experience across both primary technologies.	02 Scale + performance High-traffic React, profiling, Web Vitals, PageSpeed, and loading behavior.	03 Testing in CI AI-assisted TDD with Vitest and Playwright connected to CI pipelines.	04 API contribution Backend CRUD endpoints, lightweight Next.js APIs, and integration work.
---	--	--	---

Most relevant experience

TRANSACTIONAL B2C + HIGH TRAFFIC

Senior Software Developer Teknasyon · eSIM.io product Aug 2024 - Present · Remote B2C eSIM purchase experience built around Next.js, TypeScript, product performance, and cross-team delivery. - Reviewed server-client flow, state ownership, and frontend logic boundaries. - Built lightweight Next.js endpoints and contributed CRUD endpoints to backend projects. - Contributed to SEO, PageSpeed, image loading, and product-facing improvements. - Work with A/B page variants, analytics collaboration, and competitor research.
--

Frontend Developer Nesine.com Apr 2023 - Aug 2024 · Remote High-traffic React product in a frontend monorepo during migration from legacy .NET surfaces to a React SPA. - Investigated render behavior with React Profiler and component update analysis. - Shipped within established monorepo conventions and shared product patterns. - Worked with virtual-list patterns and performance-sensitive product surfaces. - Treated rendering, loading, and regressions as user-facing quality concerns.
--

Technical toolkit

FRONTEND-FIRST, PRODUCT-GROUNDED

Frontend	React, Next.js, TypeScript, JavaScript, Vue, Angular	Quality	Vitest, Playwright, CI-backed automated testing, code review
UI	HTML, CSS/SCSS, Tailwind CSS, shared component libraries	Performance	React profiling, Core Web Vitals, PageSpeed, perceived performance
Architecture	SSR/client boundaries, state ownership, SPA migration, monorepos	Delivery	Git, Node.js, NPM, APIs, third-party integrations, cross-team work

Experience & role fit

Additional product contexts and the evidence behind my fit for Avenga's Olo engagement.

Earlier experience

DATA, INTEGRATIONS, ENTERPRISE UI

Frontend Developer Datapad Dec 2022 - Mar 2023 · Remote

Data-focused startup product built with Next.js, TypeScript, and Tailwind CSS; connected multiple data sources to user-facing KPI surfaces.

Frontend Developer Teknasyon · Rockads product Apr 2022 - Dec 2022 · Remote

Advertising-management product with Vue 2 to Vue 3 migration, third-party platform integrations, charts, dashboards, and an evolving product direction.

Software Engineer Huawei · Petal Maps Studio May 2021 - Apr 2022 · Remote

Enterprise map-customization UI with complex state, map-engine communication, perceived-performance constraints, and international collaboration.

Frontend Developer Amatis Sep 2020 - Apr 2021 · İzmir, on-site

Angular and TypeScript dashboards that visualized ECG-related healthcare data for professional users; started as an intern and continued as a developer.

How I map to the role

WITHOUT INFLATED CLAIMS

Frontend architecture	Production experience across state ownership, server-client boundaries, complex interactions, framework migrations, and monorepo conventions.
Automated quality	Vitest and Playwright are part of an AI-assisted test-driven workflow and run in CI. I remain responsible for scenarios, review, failures, and regression value.
APIs & integrations	Contributed backend CRUD endpoints, built lightweight Next.js endpoints, and integrated external advertising and map-platform behavior.
Reusable UI	Worked with shared component libraries in production and added components when established patterns did not cover the required interface.
Communication	Cross-functional work across product, analytics, frontend, backend, UX-facing decisions, international teams, and public technical speaking.
Operational fit	Based in İzmir, experienced in remote work, and comfortable maintaining daily overlap with colleagues in the United States.

Education & language

- B.Sc. Computer Engineering - Eskişehir Osmangazi University
- Erasmus study experience in Romania
- English: upper B2 toward C1; comfortable in interviews and day-to-day technical communication

Selected talks

- Core Web Vitals and measuring a good web application
- Next.js: Am I Still a Frontend Developer?
- JavaScript internals and data structures

Interested in owning customer-facing React and Next.js features through architecture, implementation, testing, release, performance improvement, and production feedback.
